Preparation:

Remove loose dirt and dust in advance with a vacuum cleaner, brush or mop. For the maintenance cleaning mix approx. 50-100ml of Cleaner with 10l of water. In order to remove heavy soiling Cleaner can be dosed higher.

Information on Use:

Damp-mop the floor with a suitable mop. Using too much water in combination with long contact time might lead to swellings of hardwood- and cork floorings and has to be prevented.

Cleaner is also suitable for the use in cleaning machines. In order to prevent an excessive foam generation in the storage basin we recommend adding LOBA Entschäumer (Defoamer) as needed.
